(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

1. Reporting entity

(a) Ownership structure

Interfood Shareholding Company ("the Company") is incorporated as a joint stock company in Vietnam.

The Company's shares were listed on the Ho Chi Minh City Stock Exchange in accordance with the Listing License No. 61/UBCK-GPNY issued by the Ho Chi Minh City Stock Exchange on 29 September 2006.

According to the Announcement No. 395/2013 of the Ho Chi Minh City Stock Exchange, the Company's shares were delisted on 3 May 2013 and thereafter traded on Vietnam Security Depository.

The Company's shares were traded on the Unlisted Public Company Market in accordance with the Decision No. 717/QD-SGDHN issued by the Ha Noi Stock Exchange on 7 November 2016.

(b) Principal activities

The principal activities of the Company are to process agricultural and aquatic products into canned, dried, frozen, salted, and pickled products; the production of biscuits and snack food; carbonated and non-carbonated fruit juice, non-carbonated and carbonated beverages, with or without low level of alcohol (less than 10%); bottled filtered water; packaging for foods and beverages; process milk and milk related products; and to export, import products in accordance with business operation.

(c) Normal operating cycle

The normal operating cycle of the Company is generally within 12 months.

(d) Company's structure

As at 31 December 2021, the Company had 578 employees (1/1/2021: 584 employees).

Form B 09 - DN

(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

2. Basis of preparation

(a) Statement of compliance

These financial statements have been prepared in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System for enterprises and the relevant statutory requirements applicable to financial reporting.

(b) Basis of measurement

The financial statements, except for the statement of cash flows, are prepared on the accrual basis using the historical cost concept. The statement of cash flows is prepared using the indirect method.

(c) Annual accounting period

The annual accounting period of the Company is from 1 January to 31 December.

(d) Accounting and presentation currency

The Company's accounting currency is Vietnam Dong ("VND"). The financial statements are prepared and presented in Vietnam Dong rounded to the nearest thousand ("VND'000").

3. Summary of significant accounting policies

The following significant accounting policies have been adopted by the Company in the preparation of the accompanying financial statements.

(a) Foreign currency transactions

Transactions in currencies other than VND during the year have been translated into VND at rates approximating actual rates of exchange ruling at the transaction dates.

Monetary assets and liabilities denominated in currencies other than VND are translated into VND at the account transfer buying rate and the account transfer selling rate at the end of the annual accounting period, respectively, quoted by the commercial bank where the Company most frequently conducts transactions.

All foreign exchange differences are recorded in the statement of income.

Form B 09 - DN

(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

(b) Cash and cash equivalent

Cash comprises cash balances and call deposits. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

(c) Accounts receivable

Accounts receivable from customers and other receivables are stated at cost less allowance for doubtful debts.

(d) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on a weighted average basis and includes all costs incurred in bringing the inventories to their present location and condition. Cost in the case of finished goods and work in progress includes raw materials, direct labour and attributable manufacturing overheads. Net realisable value is the estimated selling price of inventory items, less the estimated costs of completion and estimated costs to sell.

The Company applies the perpetual method of accounting for inventories.

(e) Tangible fixed assets

(i) Cost

Tangible fixed assets are stated at cost less accumulated depreciation. The initial cost of a tangible fixed asset comprises its purchase price, including import duties, non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition for its intended use. Expenditure incurred after tangible fixed assets have been put into operation, such as repair, maintenance and overhaul cost, is charged to the statement of income in the year in which the cost is incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of tangible fixed assets beyond their originally assessed standard of performance, the expenditure is capitalised as an additional cost of tangible fixed assets.

(ii) Depreciation

Depreciation is computed on a straight-line basis over the estimated useful lives of tangible fixed assets. The estimated useful lives are as follows:

•	buildings	30 years
•	machinery and equipment	4-15 years
•	motor vehicles	6-10 years
•	office equipment	3-10 years

Form B 09 - DN

(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

(f) Intangible fixed assets

Software

Cost of acquiring a new software, which is not an integral part of the related hardware, is capitalised and treated as an intangible fixed asset. Software cost is amortised on a straight-line basis over 10 years.

(g) Long-term prepaid expenses

(i) Prepaid land costs

Prepaid land costs comprise prepaid land lease rentals, including those for which the Company obtained land use rights certificate but are not qualified as intangible fixed assets under prevailing laws and regulations, and other costs incurred in conjunction with securing the use of leased land. These costs are recognised in the statement of income on a straight-line basis over the term of the lease of 40 years.

(ii) Tools and supplies

Tools and supplies include assets held for use by the Company in the normal course of business whose costs of individual items are less than VND30 million and therefore not qualified for recognition as fixed assets under prevailing regulation. Cost of tools and supplies is amortised on a straight-line basis over 3 years.

(iii) Renovation expenses

Renovation expenses are recorded at cost and amortised on a straight-line basis over 2 to 3 years.

(iv) Other long-term prepaid expenses

Other long-term prepaid expenses mainly include repair and maintenance expenses which are initially stated at cost and amortised on a straight-line basis over 3 years.

(h) Trade and other payables

Accounts payable to suppliers and other payables are stated at their costs.

(i) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Form B 09 - DN

(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

Severance allowance

Under the Vietnamese Labour Code, when an employee who has worked for 12 months or more ("the eligible employees") voluntarily terminates his/her labour contract, the employer is required to pay the eligible employee severance allowance calculated based on years of service and employee's compensation at termination. Provision for severance allowance has been provided based on employees' years of service and their average salary for the six-month period prior to the end of the annual accounting period. For the purpose of determining the number of years of service by an employee, the period for which the employee participated in and contributed to unemployment insurance in accordance with prevailing laws and regulations and the period for which severance allowance has been paid by the Company are excluded.

(j) Share capital

Ordinary shares

Ordinary shares are recognised at issuance price less incremental costs directly attributable to the issuance of shares, net of tax effects. Such costs are recognised as a deduction from share premium. The difference between proceeds from the issuance of shares over the par value is recorded in share premium.

(k) Taxation

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in the statement of income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted at the end of the annual accounting period, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amounts of assets and liabilities using the tax rates enacted or substantively enacted at the end of the annual accounting period.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Form B 09 - DN

(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

(l) Revenue and other income

(i) Goods sold

Revenue from sale of goods is recognised in the statement of income when significant risks and rewards of ownership have been transferred to the buyer. No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due or the possible return of goods. Revenue from sale of goods is recognised at the net amount after deducting sales discounts stated on the invoice.

(ii) Interest income

Interest income is recognised in the statement of income on a time proportion basis with reference to the principal outstanding and the applicable interest rate.

(m) Leases

(i) Leased assets

Leases in terms of which the Company, as lessee, assumes substantially all the risks and rewards of ownership are classified as finance leases. Tangible fixed assets acquired by way of finance leases are stated at an amount equal to the lower of fair value and the present value of the minimum lease payments at inception of the lease, less accumulated depreciation.

Depreciation on finance leased assets is computed on a straight-line basis over the estimated useful lives of items of the leased assets. The estimated useful lives of finance leased assets are consistent with the useful lives of tangible fixed assets as described in accounting policy 3(e)(ii).

Assets held under other leases are classified as operating leases and are not recognised in the Company's balance sheet.

(ii) Lease payments

Payments made under operating leases are recognised in the statement of income on a straight-line basis over the term of the lease. Lease incentives received are recognised in the statement of income as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Form B 09 - DN

(Issued under Circular No. 200/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance)

(n) Borrowing costs

Borrowing costs are recognised as an expense in the year in which they are incurred, except where the borrowing costs relate to borrowings in respect of the construction of qualifying assets, in which case the borrowing costs incurred during the period of construction are capitalised as part of the cost of the assets concerned.

(o) Earnings per share

The Company presents basic earnings per share ("EPS") for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. During the year, the Company had no potential ordinary shares and therefore does not present diluted EPS.

(p) Segment reporting

A segment is a distinguishable component of the Company that is engaged either in providing related products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. The Company's primary format and secondary format for segment reporting are based on business segments and geographical segments, respectively.

(q) Related parties

Parties are considered to be related to the Company if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions, or where the Company and the other party are subject to common control or significant influence. Related parties may be individuals or corporate entities and include close family members of any individual considered to be a related party.

(r) Comparative information

Comparative information in these financial statements is presented as corresponding figures. Under this method, comparative information for the prior year is included as an integral part of the current year financial statements and is intended to be read only in relation to the amounts and other disclosures relating to the current year. Accordingly, the comparative information included in these financial statements is not intended to present the Company's financial position, results of operations or cash flows for the prior year.

4. Segment reporting

The Company mainly operates in one business segment, which is the production and sale of foods and beverages and in primarily one geographical segment, which is in Vietnam.

(c) Applicable tax rates

Under the terms of the Company's Investment Certificates, the Company has an obligation to pay the government income tax at the rate of 15% of taxable profits for the first 12 years starting from the first year of operation. Thereafter, from 2006 onwards the Company is subject to usual income tax rate applicable to enterprises before any incentives.

According to Decree No. 24/2007/ND-CP dated 14 February 2007 (which replaced Decree No. 164/2003/ND-CP dated 22 December 2003), the Company is entitled to tax incentives in relation to the relocation of its business activities out of an urban area. In 2006, the Company relocated one of its production lines from Bien Hoa City to Tam Phuoc Industrial Zone, Bien Hoa City. As a result, profit derived from this line is exempted from corporate income tax for two years and a reduction of 50% for the following six years. Also as stated in this Decree, the Company is entitled to tax incentives in relation to investments made in new production lines that are qualified under this Decree. The tax incentives include one year of exemption from corporate income tax and a reduction of 50% for the following four years applied to profit derived from the new production lines.
